

News about the company, its reforestation projects, and the sustainable management of tropical forests

Nr. 1 - September 2010

To our shareholders, customers and other interested parties

# Precious Woods invests in its turnaround

The turnaround introduced in spring of 2009 grew into a profound reorganisation of the Precious Woods Group. The core objective shared by the Board of Directors, Group Management and employees is to increase operational profitability while maintaining the reached high ecological and social standards. Although the measures introduced are beginning to show initial results (e.g. at Precious Woods Europe), internal and external factors meant that, by mid-2010, they had not yet brought about positive figures. Negative results are i.e. reported in Brazil and – due to the ban on the export of logs – in Gabon. For the Board of Directors and the Group Management, the focus is on accelerating the impact of the measures initiated.

The markets for tropical timber products have shown signs of a recovery over the past few months. Precious Woods (PW) is obtaining better prices for its products, and sales volumes have stabilized. Our cost-cutting and process-optimization programs have been showing the first signs of success in Europe and Central America. However, political restrictions have once again had a negative effect on the result: in Gabon, the government's ban on the export of logs has been enforced rigorously since January 1, 2010. Contrary to expectations, the export quotas for logs that the government announced have not yet been approved. In Brazil, the required harvest permit has been granted, however around three months late and only for a part of the harvest area. These developments have influenced the negative result of the first half of 2010.

Following four factors were the main contributors to the operative loss recorded in the first half of 2010:

- The negative impact of the ban on the export of logs from Gabon (USD 2.3 million).
- An unexpected loss on stored wood in Brazil (USD 0.9 million) caused by

- an inventory error (which is currently being investigated with an internal audit).
- Excessive fixed costs in relation to sales figures in Brazil (USD 2.3 million). These were caused primarily by the extended ban on harvesting due to the rainy season lasting longer than normal, by the delay in receiving the harvest permit and by the necessary switch to lower-quality woods.
- The USD 2.4 million drop in the net growth of biological assets in Central America (compared to the previous year) caused by the change in the valuation system for plantations introduced at the end of 2009 (see 2009 Annual Report, page 26).

The Board of Directors and the Group Management find the unsatisfactory performance at mid-2010 bitterly disappointing given that intensive work is being put into a profound turnaround. Since fall of 2009 – and with greater intensity starting at the beginning of this year – measures have been taken to tackle the above-mentioned causes. However, they are requiring longer than expected to be effective. The Board of Directors and Group Management

Revenue and net loss						
in million USD	1st half 2010	1st half 2009				
Revenue from wood and electricity sales	39.3	40.8 -3.7%				
Total operating income	42.9	44.8 -4.2%				
Loss from operating activities	-6.7	-3.7				
Net loss	-8.9	-4.8				
Key figures of the first half year 2010 (see details on page 6).						

expect the measures to have a greater impact next year and the turnaround to be completed.

The new CEO, Joachim Kaufmann, assumed responsibility at the beginning of June 2010 after an introductory phase. On his visits to all the induvidual countries, he was impressed by how committed and motivated the employees are and by the ecological and social commitment of Precious Woods. The Company can certainly be regarded as a global "benchmark" in these fields. To ensure sustainable long-term Group profit, however, an important key element - yet one which is also feasible - is the optimization of processes to increase productivity by a considerable degree. In particular, the new CEO believes that additional growth is also needed, and it will require selective investment - for example, in an additional sawmill in Gabon.

### Gabon

The export of logs from Gabon has been banned since January 1, 2010. Although PW supports the Gabonese government's intention to boost value creation locally, the government's precipitous decision caused problems for all forestry companies in Gabon. It led to PW losing export revenue at around USD 7.5 million with above-average margins in the first half of 2010. Despite this major setback. Precious Woods Gabon succeeded in compensating some of this lost revenue through increased sales of sawn wood, better prices and growth in domestic sales. Nevertheless, EBIT was still burdened by USD 2.3 million of lost income.

The details of the project to construct an additional sawmill for various types of sawn wood ("bois divers"), which were worked out in the wake of the export ban, will be addressed by the Board of Directors in the near future. In the event of a positive decision, the new sawmill will begin operating in spring of 2011.

The variable cost structures at Precious Woods Gabon have been adjusted.

Therefore forest production can be increased again as soon as the government approves the promissed export quotas or a new sawmill begins operations.

### **Central America**

After the recovery in teak prices, the harvest of teak forests was increased with primarily marginal areas being harvested and reforested with betterquality, cloned seeds. As a result, it was possible to increase sales by USD 1.8 million to USD 2.6 million compared to the previous year, in part thanks to new customers in Asia and slightly better prices.

In the first half of 2010, net growth from biological assets in the amount of USD 0.8 million was capitalized. This is USD 2.4 million less than in the same period in the previous year (USD 3.2 million). The main reason for this variance is the revised model for valuating biological assets introduced at the end of 2009.

### Brazil

The problem with harvest permits has been solved to a certain extent. In Caribe, Precious Woods was granted an extension to its harvest permit but was only able to harvest less quality wood. The permit for the first 4,000 hectares of the high-quality Monte Verde fazenda was received on August 4, 2010 – three months later than planned. Further permits are expected in October which guarantees the harvesting over the financial year 2010.

The environment and resources authority IBAMA prohibited end of December, 2009 harvesting after end of January 2010 (during rainy season). This meant that considerably less time was available for harvesting, which caused high costs. This situation forced Precious Woods to purchase wood from third parties in order to keep the sawmill and also – with the resulting biomass – the power plant at full capacity. This had a positive effect in that energy sales were USD 1.3 million up on the previous year.

A check of stocks on hand revealed a discrepancy in the inventory of around 5,000 cubic meters, worth USD 0.9 million. Precious Woods has initiated an internal audit.

In Pará, the sale process of real estate for the second half of 2010 has been intensified.

In June 2010, the previous Head of the business unit in Brazil left the company by mutual consent and has been replaced on an interim basis by the former Chief Financial Officer.

### **Europe**

The cost-cutting program at Precious Woods Europe is having a positive impact. Although sales were only slightly higher than in the second half of 2009, Precious Woods Europe reported with EBIT of USD –0.4 million a better operative result than in the previous year – despite the weak Euro and the long winter, which put pressure on revenues in the first few months of the year. The construction market in Holland hardly grew at all, while incoming orders from the United Kingdom look promising.

### Energy and CO,

The performance of Precious Woods Energy is pleasing. At USD 3.2 million, energy sales have almost doubled compared with the previous year. With EBIT, too, the result was a profit of USD 0.4 million.

However, earnings from CO<sub>2</sub> certificates fell nearly 50 percent to just over USD 0.5 million in the first half of 2010. This is because the Itacoatiara CDM\* project was revalidated at the end of 2009 after running for seven years. The new methods used to calculate methane reduction meant that fewer emission certificates can be issued.

### Share price

At the beginning of the year, the share price stood at CHF 37.50. At the time of printing of this report (31.8.2010) the rate was CHF 30.00, CHF 7.50 lower.

### **Financing**

The Annual General Meeting in May 2010 approved the creation of conditional and authorized share capital. The company can thus place either a convertible bond of an amount up to CHF 60 million or a capital increase of an amount up to CHF 40 million on the capital market.

The requirements for securing the Group's medium-term financial base are as follows: the creation of new capital, the discussions initiated on the refinancing of the loans falling due in spring of 2011, the already announced sales of non-operational assets and the far reaching measures to ensure the turnaround.

#### Outlook

In the second half of the year, Precious Woods will focus on significantly improving productivity, on obtaining further harvest permits in Brazil and on expanding capacity in Gabon. Furthermore, increasing sales at PW Europe are also important. Central America will meet its objectives for the year. Based on current business development and the additional expenditures required to improve the situation in Brazil, Precious Woods is predicting that the operating results, after adjustment for currency effects and without one-offs, can be improved slightly in the second half of 2010.

# Notes to interim condensed consolidated financial statements

The unaudited interim condensed consolidated financial statements of Precious Woods Group for the six months ended June 30, 2010, have been prepared in accordance with IAS 34 and were authorized for issue by the Board of Directors on August 16, 2010. The interim condensed consolidated financial statements do not include all information and disclosures required in the annual financial statements, and should be read in conjunction with the Group's annual financial statements as at December 31, 2009. They mainly focus on new activities, events and circumstances and do not duplicate information previously reported.

#### 1. Significant accounting policies

The accounting policies adopted in the preparation of the interim condensed consolidated financial statements are consistent with those followed in the preparation of the Group's annual financial statements for the year ended December 31, 2009, except for the adoption of new standards and interpretations as of January 1, 2010, noted below:

- IFRS 2 Share-based Payment –
  Group Cash-settled Share-based
  Payment Transactions: The standard
  has been amended to clarify the
  accounting for group cash-settled
  share-based payment transactions.
  This amendment also supersedes
  IFRIC 8 and IFRIC 11. The adoption
  of this amendment did not have any
  impact on the financial position or
  performance of the Group.
- IFRS 3 Business Combinations: The revised standard introduces significant changes in the accounting for

business combinations occurring after July 1, 2009. Changes affect the valuation of non-controlling interest. the accounting for transaction costs, the initial recognition and subsequent measurement of a contingent consideration and business combinations achieved in stages. These changes will impact the amount of goodwill recognized, the reported results in the period that an acquisition occurs and future reported results. The adoption of this revised standard did not have any impact on the financial position or performance of the Group as it applies prospectively.

- IAS 27 Consolidated and Separate Financial Statements: This amended standard requires that a change in the ownership interest of a subsidiary (without loss of control) is accounted for as a transaction with owners in their capacity as owners. Therefore, such transactions will no longer give rise to goodwill, nor will it give rise to a gain or loss. Furthermore, the amended standard changes the accounting for losses incurred by the subsidiary as well as the loss of control of a subsidiary. The changes will affect future acquisitions or loss of control of subsidiaries and transactions with non-controlling interests.
- IFRIC 17 Distribution of Non-cash
   Assets to Owners: This interpretation provides guidance on accounting for arrangements whereby an entity distributes non-cash assets to shareholders either as a distribution of reserves or as dividends. The interpretation had no effect on the financial position nor the performance of the Group.

Improvements to IFRSs (issued April 2009): In April 2009 the IASB issued its second omnibus of amendments to

its standards, primarily with a view to removing inconsistencies and clarifying wording. There are separate transitional provisions for each standard. The adoption of the following amendments resulted in changes to accounting policies but did not have any impact on the financial position or performance of the Group.

- IFRS 8 Operating Segment Information: This amendment clarifies that segment assets and liabilities need only be reported when those assets and liabilities are included in measures that are used by the chief operating decision maker. The Group's chief operating decision-maker does review segment net working capital.
- IAS 36 Impairment of Assets: The amendment clarified that the largest unit permitted for allocating goodwill, acquired in a business combination, is the operating segment as defined in IFRS 8 before aggregation for reporting purposes. The amendment has no impact on the Group as the annual impairment test is performed before aggregation.

Other amendments resulting from improvements to IFRSs to the following standards did not have any impact on the accounting policies, financial position or performance of the Group:

- IFRS 2 Share-based Payment
- IFRS 5 Non-current Assets Held for Sale and Discontinued Operations
- IAS 1 Presentation of Financial Statements
- IAS 7 Statement of Cash Flows
- IAS 38 Intangible Assets
- IAS 39 Financial Instruments: Recognition and Measurement
- IFRIC 9 Reassessment of Embedded Derivatives

• IFRIC 16 Hedge of a Net Investment in a Foreign Operation

The Group has not early adopted any other standard, interpretation or amendment that was issued but is not yet effective.

### 2. Seasonality

The first half year of the forestry operations in Brazil is characterized by the rainy season (January to May) during which no logs are harvested and processing yields and sales of logs are lower than can be achieved in the second half of the year. For the reporting period, the unfavorable seasonal

effect is as expected, just as a favorable seasonal effect for the second half of the year can be assumed in Brazil.

### 3. Financial information by segment

The Group's reportable segments are Sustainable Forest Management Brazil, Sustainable Forest Management Gabon, Timber Trading Europe, Forest Plantations and Carbon & Energy.

### Operating segments of Precious Woods (in USD 1000)

June 30, 2010	Sustainable Forest Man- agement Brazil	Sustainable Forest Man- agement Gabon	Timber Trading Europe	Forest Planta- tions	Carbon & Energy	Others*	Consoli- dated

<sup>\*</sup> Eliminations and adjustments consist of the intersegment eliminations in revenue and the positions from Precious Woods Holding that cannot be allocated to a specific segment.

### 4. Restructuring

The restructuring provision on June 30, 2010, amounts to USD 1.3 million (December 31, 2009: USD 3.0 million) and relates to the Group's restructuring activities in Para, Amazon, Gabon and the Netherlands. USD 1.0 million of the restructuring provision was used in the first half-year of 2010. The bankruptcy of the Netherland-based subsidiary Precious Woods Manufacturing BV resulted in a release of the restructuring provision of USD 0.5 million.

#### 5. Share capital

The ordinary share capital of the Company amounts to CHF 171,917,750 (3,483,355 registered shares with a nominal value of CHF 50 each). During the first half-year of 2010 there were no changes to the ordinary share capital. On May 20, 2010, the Annual General Meeting approved an increase of the conditional share capital and the creation of authorized share capital.

### 6. Subsequent events

In July 2010, a Brazilian subsidiary won an important court case against IBAMA (Brazilian Ministry of the Environment). This case reduces the contingencies from the IBAMA fines (USD 32 million on December 31, 2009, see note 35 in the Annual Report 2009) by more than 80 percent.

Cautionary note on forward-looking statements: This report contains forward-looking statements that reflect Precious Woods current views with respect to future events. These forward-looking statements are based on assumptions and involve risks and uncertainties with regard to future global economic conditions, foreign exchange rates, regulatory rules, market conditions, environmental factors, the actions of competitors and other factors. These risks and uncertainties could cause actual results to differ materially from those contained in the forward looking statements. Precious Woods does not assume any obligation to update information or forward-looking statements set forth in this document. The Precious Woods interim reporting is available in both German and English. The printed English text shall prevail. Precious Woods Holding Ltd. Baarerstrasse 79
